

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant :	Thomas Mueller	Art Unit :	2858
Serial No. :	10/526,097	Examiner :	Anjan K. Deb
Filed :	September 7, 2005	Conf. No. :	2670
Title :	CALIBRATING A LIGHT-SENSITIVE CHIP (AS AMENDED)		

**MAIL STOP AMENDMENT**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

INFORMATION DISCLOSURE STATEMENT

Applicants request consideration of the references listed on the attached PTO-1449 form. Under 37 C.F.R. § 1.98 (a)(2)(ii), only copies of foreign patent documents and/or non-patent literature are enclosed. Copies of any listed U.S. patents or U.S. patent application publications can be provided upon request.

A copy of a German examination report from the corresponding German application is cited herein. The prior art cited in this examination report is already of record in this application. According to German counsel:

2004. The Office Action presents eight documents. The features of the claims 1, 4, 8 and 10 of the German patent application are comparable to the features of the claims 1, 4, 8 and 10 of the US patent application. According to the Examiner, claim 1 of the German patent application would not include an inventive step over a combination of the documents DS(1), DE 2904884 C3, DS(2), JP 09045744 A, and DS(3), DE 19952938 A1. According to the Examiner's opinion regarding claim 4, it is common knowledge of a person skilled in the art to choose a distance between two measurement wavelengths so that the form of the curve can be clearly reconstructed. In particular, the person skilled in the art also knows that the Nyquist-theorem has to be considered at signals with a waveform. Independent claim 8 would not include an inventive step over a combination of the documents DS(2) and DS(5), JP 02105078 A. According to the German Patent and Trademark Office, independent claim 10 would not comprise an inventive step over a combination of DS(2) and DS(5).

Finally, Applicants are submitting herewith a printout of an IEEE Internet page showing the publication date of 1999 for the Perry reference submitted in the IDS filed on January 19,

Applicant : Thomas Mueller
